Idaho Correctional Industries

2020
OUR STORY...

In 1974, the Idaho State Legislature passed the Correctional Industries Act creating Idaho Correctional Industries (ICI) as a financially self-sufficient organization. The act empowered the Idaho Board of Correction as the governing body over ICI.

Our objective is to decrease idleness by providing incarcerated inmates with job training and work experience. We accomplish this by training inmates in a realistic environment that teaches work ethics and skills that increase their chance for successful transition to a productive member of society. We also aim to reduce the tax burden of the correctional system. We are able to do this by promoting positive inmate behavior while incarcerated, reducing the recidivism rate, operating a self-funded program and offering outstanding value to our customers.

The ICI staff is comprised of business and manufacturing professionals experienced in product design, vocational training, manufacturing, marketing and sales. This experience is the foundation of developing inmate training programs that manufacture products that can be sold to authorized markets.

The state legislation defines the markets that are eligible to purchase ICI products. Authorized markets includes state and local government, non-profit, private sector wholesalers and retailers within the state of Idaho. With over 45 years of experience, we are excited to see what new opportunities are available to us. The inmate population is ever changing and our goal is to provide as much training to the population as possible. We look forward to expanding the skills that inmates are able to attain.

The mission of Idaho Correctional Industries is to provide technical and pro-social life skills to incarcerated individuals to enhance the chance for successful reentry into our communities.

Vision

Idaho Correctional Industries strives to be the leading correctional industries in the country by providing diversified training opportunities which strengthen Idaho’s work force, reduces recidivism and allows for tax dollars to be appropriated to other community needs.

Values

• ICI is committed to constant training and mentoring of Inmate Trainees.
• ICI is committed to staff development and advancement.
• ICI maintains independent financial sustainability.

Goals

• Provide additional training opportunities to Incarcerated individuals.
• Reduce recidivism.
• Develop, retain and advance ICI Staff.
